ABOUT ME

Student next to the diploma at the ITIS Mario del Pozzo.
Hi, I'm Filippo Ferrando, my strengths are definitely the networking, programming and management of unix-based systems.
I consider myself a stubborn person but always ready to learn something new, independent, capable of solving problems of various kinds.
I have different passions such as Karting where I have learned many notions of mechanics and driving, I have been playing the guitar since I was very young and I am very interested in the field of study I am following now, the topics that attract me most are Blockchain technologies, IoT and cybersecurity.
I think that working in this field is not reduced only to carrying out the work itself, I believe instead that it is a way of approaching life; this sector requires constant updating of one's skills to always keep up and not everyone is willing to follow such a path

WORK EXPERIENCE

[01/05/2021 – 01/10/2021] **System Engineer**

Fabrax Informatica

City: Cuneo
Country: Italy

[01/04/2018 – Current] **Webmaster**

https://github.com/filippo-ferrando/blockchain

HOBBIES AND INTERESTS

Japanese Culture

I am passionate about Japanese culture, from comics to cars of the years '80/'90 passing through modern architecture

Motor Sport

Since I was a child I have been passionate about everything that had at least 2 wheels and an engine, at the moment I enjoy racing on the track as an amateur with my kart.

Music

From the age of 6 I continued my studies first of classical guitar and then of electric guitar at the Insieme Musica school

VOLUNTEERING
